**Remarks:** For explanations on data summarization methods, abbreviations and other pertinent information, please see the comments in the introduction to the Regional Variety Trials. All varieties are immune to flax rust. NT - Not tested for disease, until a full rating is generated assume that the variety is very susceptible to the disease. New flax registration and insufficient data to describe: FP2591. XX - Insufficient data to describe. ☼ = Protected by PBR (UPOV 78), ☼ = Protected by PBR (UPOV 91), ☼\* = pending PBR protection. \* Flagged for possible removal in 2024.
